SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media	<p>: Foam</p> <p>Carbon dioxide (CO₂)</p> <p>Dry chemical</p> <p>Water spray</p>
Unsuitable extinguishing media	<p>: High volume water jet</p>
Specific hazards during fire-fighting	<p>: Do not allow run-off from fire fighting to enter drains or water courses.</p> <p>Flash back possible over considerable distance.</p>
Hazardous combustion products	<p>: Carbon oxides</p>
Specific extinguishing methods	<p>: Use a water spray to cool fully closed containers.</p>
Further information	<p>: Collect contaminated fire extinguishing water separately. tive equipment and emergency procedures	<p>Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.</p>
Environmental precautions	<p>: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.</p>
Methods and materials for containment and cleaning up	<p>: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).</p>

SECTION 7. HANDLING AND STORAGE

Advice on protection against fire and explosion	<p>: Do not spray on a naked flame or any incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.</p>
Advice on safe handling	<p>: Avoid formation of aerosol. Do not breathe vapours/dust. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.</p>
Conditions for safe storage	<p>: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards. Possible peroxide former. Do not allow to evaporate to near dryness; store away from light and heat. Store under nitrogen after opening. Periodically test product stored for long periods for peroxide formation. Addition of water or appropriate reducing materials will lessen peroxide formation.</p>
